

Stem Cell Agency Honors Nancy Reagan's Support

Posted: March 6, 2016

03/06/16

"With the passing of former first lady Nancy Reagan the California Institute for Regenerative Medicine has lost a good friend and a champion of stem cell research," says Jonathan Thomas, PhD, JD, Chair of the CIRM Board. "Mrs. Reagan was an advocate for stem cell research for many years and her voice was an important one in helping ensure the passage of Proposition 71. Her call to protect the ability of scientists to "pursue medical miracle possibilities" echoed the feelings of millions of Americans looking to stem cell research for help in battling deadly diseases. We, and patients everywhere, were fortunate to have such a great champion for the work that we do."

About CIRM

At CIRM, we never forget that we were created by the people of California to accelerate stem cell treatments to patients with unmet medical needs, and to act with a sense of urgency commensurate with that mission.

To meet this challenge, our team of highly trained and experienced professionals actively partners with both academia and industry in a hands-on, entrepreneurial environment to fast track the development of today's most promising stem cell technologies.

With \$3 billion in funding and over 280 active stem cell programs in our portfolio, CIRM is the world's largest institution dedicated to helping people by bringing the future of medicine closer to reality.
