

## 2013 Creativity Students

### Through their lens: 2013 High School Creativity Students

The CIRM Creativity Awards support summer internship programs that introduce high school students to stem cell science and foster the next generation of scientists. This year, we decided to let the students tell their own stories about life in the lab and their hopes for the future.

We asked students to contribute to our #CIRMStemCellLab program, documenting their experience through photos on Instagram, short videos about what they've learned, and blog entries describing their research projects.

#### Instagram

See the summer through the interns' eyes on the Instagram feed

#### Video

Hear about the research projects through the student videos

#### Blog

Read about the student's experiences of life in the lab through their blog entries.
