

Acceptably derived embryonic stem cell lines

Acceptably derived embryonic stem cell lines

Title 17 California Code of Regulations Section 100080(f) designates all human pluripotent stem cell lines derived in accordance with the CIRM regulations as "acceptably derived." These cell lines may be used in CIRM funded research.

CIRM has received and reviewed a Certification Form for Human Pluripotent Stem Cell Line Derivation for the lines identified below. Based on the certification provided by the individuals or organization, CIRM designates the line as "acceptably derived." Summary information regarding the specific cell line is provided below. Additional information may be obtained by contacting the individual(s) identified below.

See the online draft version of the NIH Request for Human Embryonic Stem Cell Line to be Approved for Use in NIH Funded Research .

Human Stem Cell Lines Determined to be "Acceptably Derived" by CIRM

Line name	Contact	Derivation source	Derivation Date	Link to donor	Donor medical history	Comments
multiple lines See certification form	Leslie Thompson lmthomps@uci.edu	iPS	2009-2011	yes	yes	<ul style="list-style-type: none"> • hESC lines de-identified • other conditions may apply See certification form
UCLA10	Steve Peckman speckman@mednet.ucla.edu	Surplus IVF-embryo	2011	yes	yes	<ul style="list-style-type: none"> • hESC lines de-identified • other conditions may apply See certification form
