

Conference

Objective

This Program Announcement (PA) will support the development and conduct of scientific conferences relevant to stem cell research. A scientific conference is defined as an organized event where persons physically assemble to exchange scientific information or explore a defined scientific subject. Support of such conferences is contingent on the fiscal and programmatic priorities of CIRM. Conference grant awards are open to non-profit organizations in California.

CIRM plans to allocate up to \$300,000 annually for this program. The total amount awarded and the number of awards will depend upon the number, quality, timing, and costs of the proposals received, and on CIRM programmatic priorities. The maximum award (i.e., total for all years requested) that will be supported under this PA is the lesser of \$50,000 or 50% of the total conference budget, unless otherwise approved by the ICOC.
