
The HD iPSC Consortium: Repeat Length Dependent Phenotypes for Assay Development

Grant Award Details

The HD iPSC Consortium: Repeat Length Dependent Phenotypes for Assay Development

Grant Type: iPSC Consortia Award

Grant Number: RP1-05741

Project Objective: Objective is to generate and validate iPSC lines from individuals with Huntington's Disease as part of an HD iPSC Consortium.

Investigator:

Name:	Clive Svendsen
Institution:	Cedars-Sinai Medical Center
Type:	PI

Name:	Margaret Sutherland
Institution:	National Institutes of Health
Type:	Partner-PI

Disease Focus: Huntington's Disease, Neurological Disorders

Collaborative Funder: NIH

Human Stem Cell Use: iPS Cell

Cell Line Generation: iPS Cell

Award Value: \$300,000

Status: Closed
