Alpha Stem Cell Clinic Centers of Excellence created around California delivering stem cell therapies to patients in need

projects given Regenerative
Medicine Advanced Therapy
(RMAT) designation by the FDA
potentially making them eligible for
faster review and approval

world class stem cell research laboratories to advance the field in California funded

projects that are in late-stage preclinical testing, the last step before applying to the U.S. Food and Drug Administration (FDA) for permission to start a clinical trial

projects where we provided funding for early stage research have also gone on to be tested in clinical trials

children born with Severe Combined Immunodeficiency (SCID), a fatal immune disorder, cured

clinical trials for COVID-19, cancer, stroke, heart disease, diabetes, vision loss, sickle cell disease, HIV/AIDS, spinal cord injury, leukemia, immune disorders, kidney failure, arthritis, Parkinson's disease, and more

>1,000 projects from early stage Discovery research to clinical trials

>2,000 patients enrolled in CIRM-funded clinical trials

## **Delivering** on our Mission

to bring cures to those who need them most.

## 604 Clinical Trials Funded

CIRM doesn't just fund stem cell research we support it at every step along the way.

CIRM partners with patients and patient advocates to bring their knowledge and expertise to our work, helping guide and shape the projects we invest in.

Something better than hope.
Right now.

CIRM was created in 2004 when voters approved Proposition 71 by 59%.

**CIRM MISSION:** Accelerate stem cell treatments to patients with unmet medical needs

**CIRM has made** California the global center of stem cell research

## Our funding has generated:

- **\$10.7 billion** of additional gross output (sales revenue)
- \$641.3 million of additional state/local tax revenues
- \$726.6 million of additional federal tax revenues.
- 56,549 additional full-time equivalent (FTE) jobs, half of which offer salaries considerably higher than the state average

We have used our funding to leverage an additional \$9.89 billion in additional investments in stem cell research.

To learn more about all CIRM-funded stem cell clinical trials and other research, view our website at: www.cirm.ca.gov
