**Agenda Item # 6: Consideration of Standards Working Group items for final adoption Regulations Section 100120: Record Keeping and MES Amendments Package: Sections 100080, 100085, 100090, 100100.**

**Note:** this item was not considered at this meeting due to OAL and public comment timing, and was tabled for consideration at the January 2008 ICOC meeting.

**Agenda Item # 7: Chairman's Report.**

Chairman Klein gave a very brief report, given the busy agenda. He covered the following:

Proposition 71 provides that there is a financial oversight committee, the Citizen's Financial Accountability Oversight Committee, making the CIRM the only agency in the state with its own oversight committee. At the most recent meeting of this committee, the Treasurer's appointment to the committee made very positive comments about the CIRM, how much we have accomplished and how few mistakes we've made while getting so much done in such a short time.

When the initiative started, it was well known that it would take about three years to get the systems refined and up, and that is where we are right now.

The staff of the CIRM is a tremendous asset, and the board members – an invaluable resource to the CIRM and the state -- have made a remarkable commitment, in over a hundred public meetings. All have made an extraordinary effort that began many years ago and has never faltered.

#### **Agenda Item # 8: President's Report.**

Interim President Dr. Richard Murphy covered some of the challenges CIRM had been through in recent weeks, highlighting the benefits of constructive criticism, and also of keeping everything in perspective. He highlighted the need to look closely at Footnote 1 in the ICOC Conflict of Interest Policy, which played a role in misunderstandings that led to some of the recent challenges.

Dr. Murphy emphasized that the CIRM is a new and precedent setting organization, as the first state agency in the history of the US to fund medical research at such a high level. He suggested we not let ourselves be deterred from our mission by honest mistakes, and that we remember that the recent challenges pale in comparison to the CIRM's achievements.

Highlighting CIRM's accomplishments over the past three years, Dr. Murphy mentioned that the CIRM has defeated in court opponents who tried to derail the will of the people who voted for Proposition 71, has created a first-rate funding agency for supporting scientific research; has assembled a grants working group composed of some of the country's best scientists from leading research institutions to help evaluate grant applications; has established ethical guidelines for working with stem cells that have become world standards; and has created intellectual property policies that will ensure the people of California will benefit medically and also financially from the investments they have made in stem cell research. He reminded us that CIRM has also processed over 400 grant applications and committed over \$200 million in grants for research, training and facilities. All of this has been done with a skeleton crew of staff.

In conclusion, Dr. Murphy suggested that while we must always work hard to correct shortcomings, we should not forget that CIRM has begun the long trek towards realizing Proposition 71's vision of developing stem cell therapies to relieve the suffering of many. The journey will be long, but when we look back, the difficulties we have experienced

will be seen as inevitable growing pains while our achievements will be seen as major steps forward with far-reaching health consequences for us all.
