

ICOC Meeting of July 12, 2005
Agenda Item 14
Contracts and Interagency Agreements

Background

Health and Safety Code Section 125290.30 (f) states that the California Institute for Regenerative Medicine (CIRM) governed by the competitive bidding and contract processes followed by the University of California.

Information

A list of all contracts and interagency agreements executed by CIRM and payments made through 5/31/2005 is given in Attachment A. The attachment also provides information on the processes used to select the contractors (NOTE: Interagency agreements are not subject to competitive bidding requirements.)

While CIRM has been using the UC Procurement Policies and Procedures in selecting and executing contracts with private individuals and firms, we are developing a proposed contract policy for consideration by the ICOC at the August meeting. Assuming that a Governance Subcommittee is appointed, the proposal would be presented to that body.
