

1 **§ 100303. Publication Requirements.**

2 (a) A Grantee must provide for public access to any publication of a CIRM-Funded
3 Invention or CIRM-Funded Technology, as provided in this section.

4 (b) For any manuscript that is peer-reviewed and accepted for publication in a scientific
5 journal, the Grantee must ensure that an electronic version of the final peer-reviewed
6 manuscript is submitted to PubMed Central or to CIRM to be made publicly available no later
7 than 12 months after the official date of publication. The Grantee shall make reasonable efforts
8 to comply with this requirement through submission to PubMed Central, including notifying
9 CIRM of the PubMed Central identification number. If the Grantee is unable to submit the
10 manuscript to PubMed Central, the Grantee may comply by providing the manuscript to CIRM,
11 no later than 12 months after the official date of publication. In lieu of the final peer-reviewed
12 manuscript, the Grantee may submit the final published article.

13 (c) For publications other than those described in subsection (b), including meeting
14 abstracts, the Grantee must comply by providing the manuscript to CIRM no later than 12
15 months after the official date of publication.

16 (d) Grantees are responsible for ensuring that any publishing or copyright agreements
17 concerning submitted articles fully comply with this Regulation.

18 (e) Within 60 calendar days of the publication, Grantees shall notify CIRM of the Grant
19 Number, Grantee Institution, Principal Investigator and the PubMed Central identification
20 number for the manuscript. In addition, Grantees shall provide CIRM with a short paragraph,
21 written for the general public, describing both the importance of the discovery that is the subject
22 of the publication and the approach or methodology employed. Neither the publication abstract
23 nor the statement of public benefit submitted as part of the application satisfy this requirement.

1 (f) In the final manuscript, authors must include the URL of a website where the CIRM
2 MTA (or similar document) can be accessed to facilitate requests for publication-related
3 materials.

4 (g) CIRM grantees must acknowledge CIRM support of research findings in publications,
5 announcements, presentations, and press releases by the grantees. An example of an
6 acknowledgement is: “The research was made possible by a grant from the California Institute
7 for Regenerative Medicine (Grant Number _____). The contents of this publication are solely
8 the responsibility of the authors and do not necessarily represent the official views of CIRM or
9 and other agency of the State of California.”
