

1       **§ 100403. Publication Requirements.**

2               (a) A Grantee must provide for public access to any publication of a CIRM-  
3       Funded Invention or CIRM-Funded Technology, as provided in this section.

4               (b) For any manuscript that is peer-reviewed and accepted for publication in a  
5       scientific journal, the Grantee must ensure that an electronic version of the final peer-reviewed  
6       manuscript is submitted to PubMed Central or to CIRM to be made publicly available no later  
7       than 12 months after the official date of publication. The Grantee shall make reasonable efforts  
8       to comply with this requirement through submission to PubMed Central, including notifying  
9       CIRM of the PubMed Central identification number. If the Grantee is unable to submit the  
10      manuscript to PubMed Central, the Grantee may comply by providing the manuscript to CIRM,  
11      no later than 12 months after the official date of publication. In lieu of the final peer-reviewed  
12      manuscript, the Grantee may submit the final published article.

13              (c) For publications other than those described in subsection (b), including  
14      meeting abstracts, the Grantee must comply by providing the manuscript to CIRM no later than  
15      months after the official date of publication.

16              (d) Grantees are responsible for ensuring that any publishing or copyright  
17      agreements concerning submitted articles fully comply with this Regulation.

18              (e) Within 60 calendar days of the publication, Grantees shall notify CIRM of the  
19      Grant Number, Grantee Institution, Principal Investigator and the PubMed Central  
20      identification number for the manuscript. In addition, Grantees shall provide CIRM with a  
21      short paragraph, written for the general public, describing both the importance of the discovery  
22      that is the subject of the publication and the approach or methodology employed. Neither the

1 publication abstract nor the statement of public benefit submitted as part of the application  
2 satisfy this requirement.

3 (f) A Grantee must ensure that the final manuscript of any publication of CIRM-  
4 funded Research includes the URL of a website where an MTA (or similar document) can be  
5 accessed to facilitate requests for Publication-related Biomedical Materials.

6 (g) A Grantee must acknowledge CIRM funding of research in publications,  
7 announcements, presentations, and press releases. An example of an acknowledgement is:  
8 “This research was made possible by a grant from the California Institute for Regenerative  
9 Medicine (Grant Number \_\_\_\_\_). The contents of this publication are solely the  
10 responsibility of the authors and do not necessarily represent the official views of CIRM or any  
11 other agency of the State of California.”
