

Help us sprint to the finish line

The stem cell agency is at a pivotal point in its life and we want you to help us shape our future.

Our mission is to accelerate stem cell therapies to people with unmet medical needs. Over the last ten years we have helped advance the science to the point where we now have a dozen programs for diabetes, heart disease, cancer, HIV/AIDS, in clinical trials. But there is still much to do.

We are now developing a Strategic Plan to help shape the direction we take in the next few years. We want those years to be filled with purpose and to push the science even further and faster than before.

The voices of the patients and patient advocates have always been the most important to us. You are the reason we are here. That's why we want to hear from you what you think we could do, what you think we should do.

So come and join us
for a chance to share your ideas for our future

Tuesday, July 14th at noon
Eli and Edythe Broad CIRM Center for
Regenerative Medicine and Stem Cell Research at USC
1425 San Pablo Street, 1st floor conf. room Los Angeles, CA 90033
