

# Real Life<sup>TM</sup>

**Larry Goldstein, PhD**  
Chair, CIRM Neuro Task Force  
Neuro Task Force Meeting  
August 25, 2023

**CIRM**  
CALIFORNIA STEM CELL AGENCY

1. What percentage of 1.5 billion plus does task force want to make recommendations for?
2. What percentage of 1.5 billion plus should be allocated based on quality/novelty of ideas and approach as assessed by grants working group as opposed to centralized planning?
3. What other measures of impact of different disease areas are available in addition to DALY?
4. Are there any important areas of neuro research that we are missing?

Possible clustering of diseases into major areas analogous to neuropsychiatric disease clustering so that our review can be done at a higher level:  
 What percentage of 1.5 billion plus does task force want to make recommendations for?

Neuropsychiatric	Neurodegenerative diseases	Neuro injury
Schizophrenia Depression Drug abuse Bipolar disease Mania Autism Spectrum Disorders	Alzheimer's ALS Parkinson's FTD Huntingtons Others? Eye disorders	Stroke TBI Spinal cord injury Neuropathy CNS and PNS Cancers Epilepsy
