

Data & Safety Monitoring Services for the California Institute for Regenerative Medicine (CIRM) Alpha Clinics Network

The **UCLA Clinical and Translational Science Institute Data and Safety Monitoring Board (DSMB)** will provide services to Alpha Clinic network trials, with an emphasis on investigator-initiated trials (IITs) for which expert DSMB consultative membership may be difficult to secure at their home institution. These services are available to CIRM CLIN grant applicants and other network site trials not funded by CIRM.

KEY SERVICES PROVIDED

Initial DSMB consultation to evaluate study design and determine the best strategy for oversight of the trial

DSMB review services which would be provided pursuant to the UCLA DSMB charter and be specific to the clinical trial

Real-time participant eligibility reviews

Monitoring and auditing services structured according to the complexity of the study and the safety profile of the investigational agents

To discuss how we can provide services for your CIRM Alpha Clinic Network trials, please contact TNHughes@mednet.ucla.edu.
