

SAF Update

Jon Thomas, PhD, JD
President & CEO

ICOC

September 25, 2025

Purpose

Provide an update on the SAF
status and budget forecast

Strategic Impact Goals

Accelerating Discovery & Translation	Cell & Gene Therapy Approvals	Accessibility & Affordability of Therapies	Diverse Workforce Development
<p>Goal 1: Catalyze the identification and validation of at least four novel targets and biomarkers, ensuring integration into preclinical or clinical research for diseases in California</p> <p>Goal 2: Accelerate the development and utilization of 5-8 technologies that have the potential to improve safety, efficacy, and/or quality of cell and gene therapies</p>	<p>Goal 3: Advance 4-7 rare disease projects to Biologics License Application (BLA)</p> <p>Goal 4: Propel 15-20 therapies targeting diseases affecting Californians to late-stage trials</p>	<p>Goal 5: Ensure that every BLA-ready program has a strategy for access and affordability</p>	<p>Goal 6: Bolster CIRM’s workforce development programs to address gaps and meet evolving demands in regenerative medicine</p>

Financial Plan:

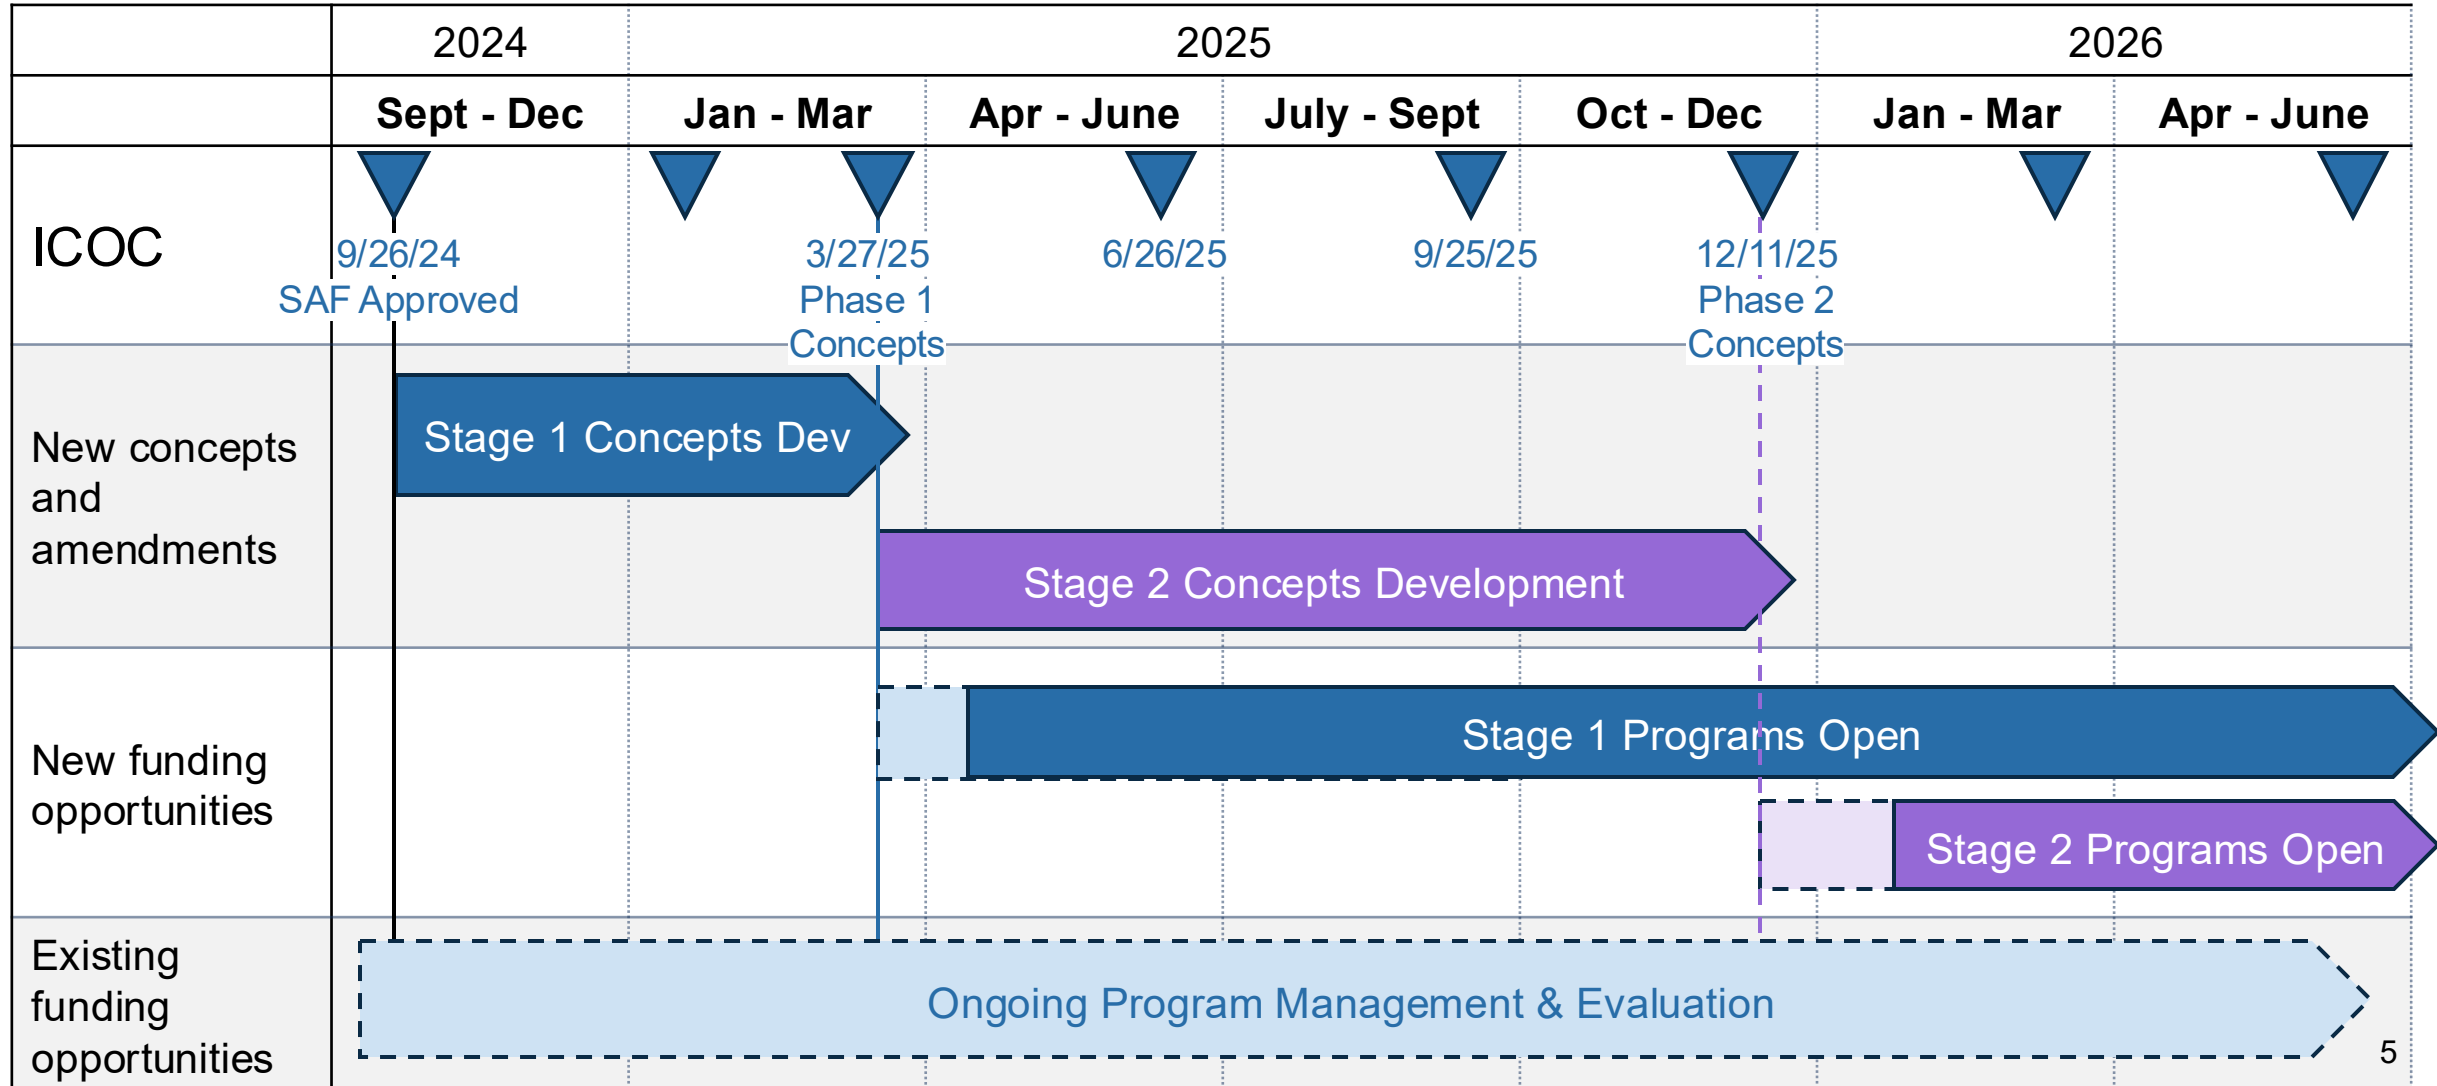

\$3.5B* in new funding commitments over 6 years

*Does not include funds for Accessibility & Affordability: (Community Care Centers Excellence Support & Patient Support Program)

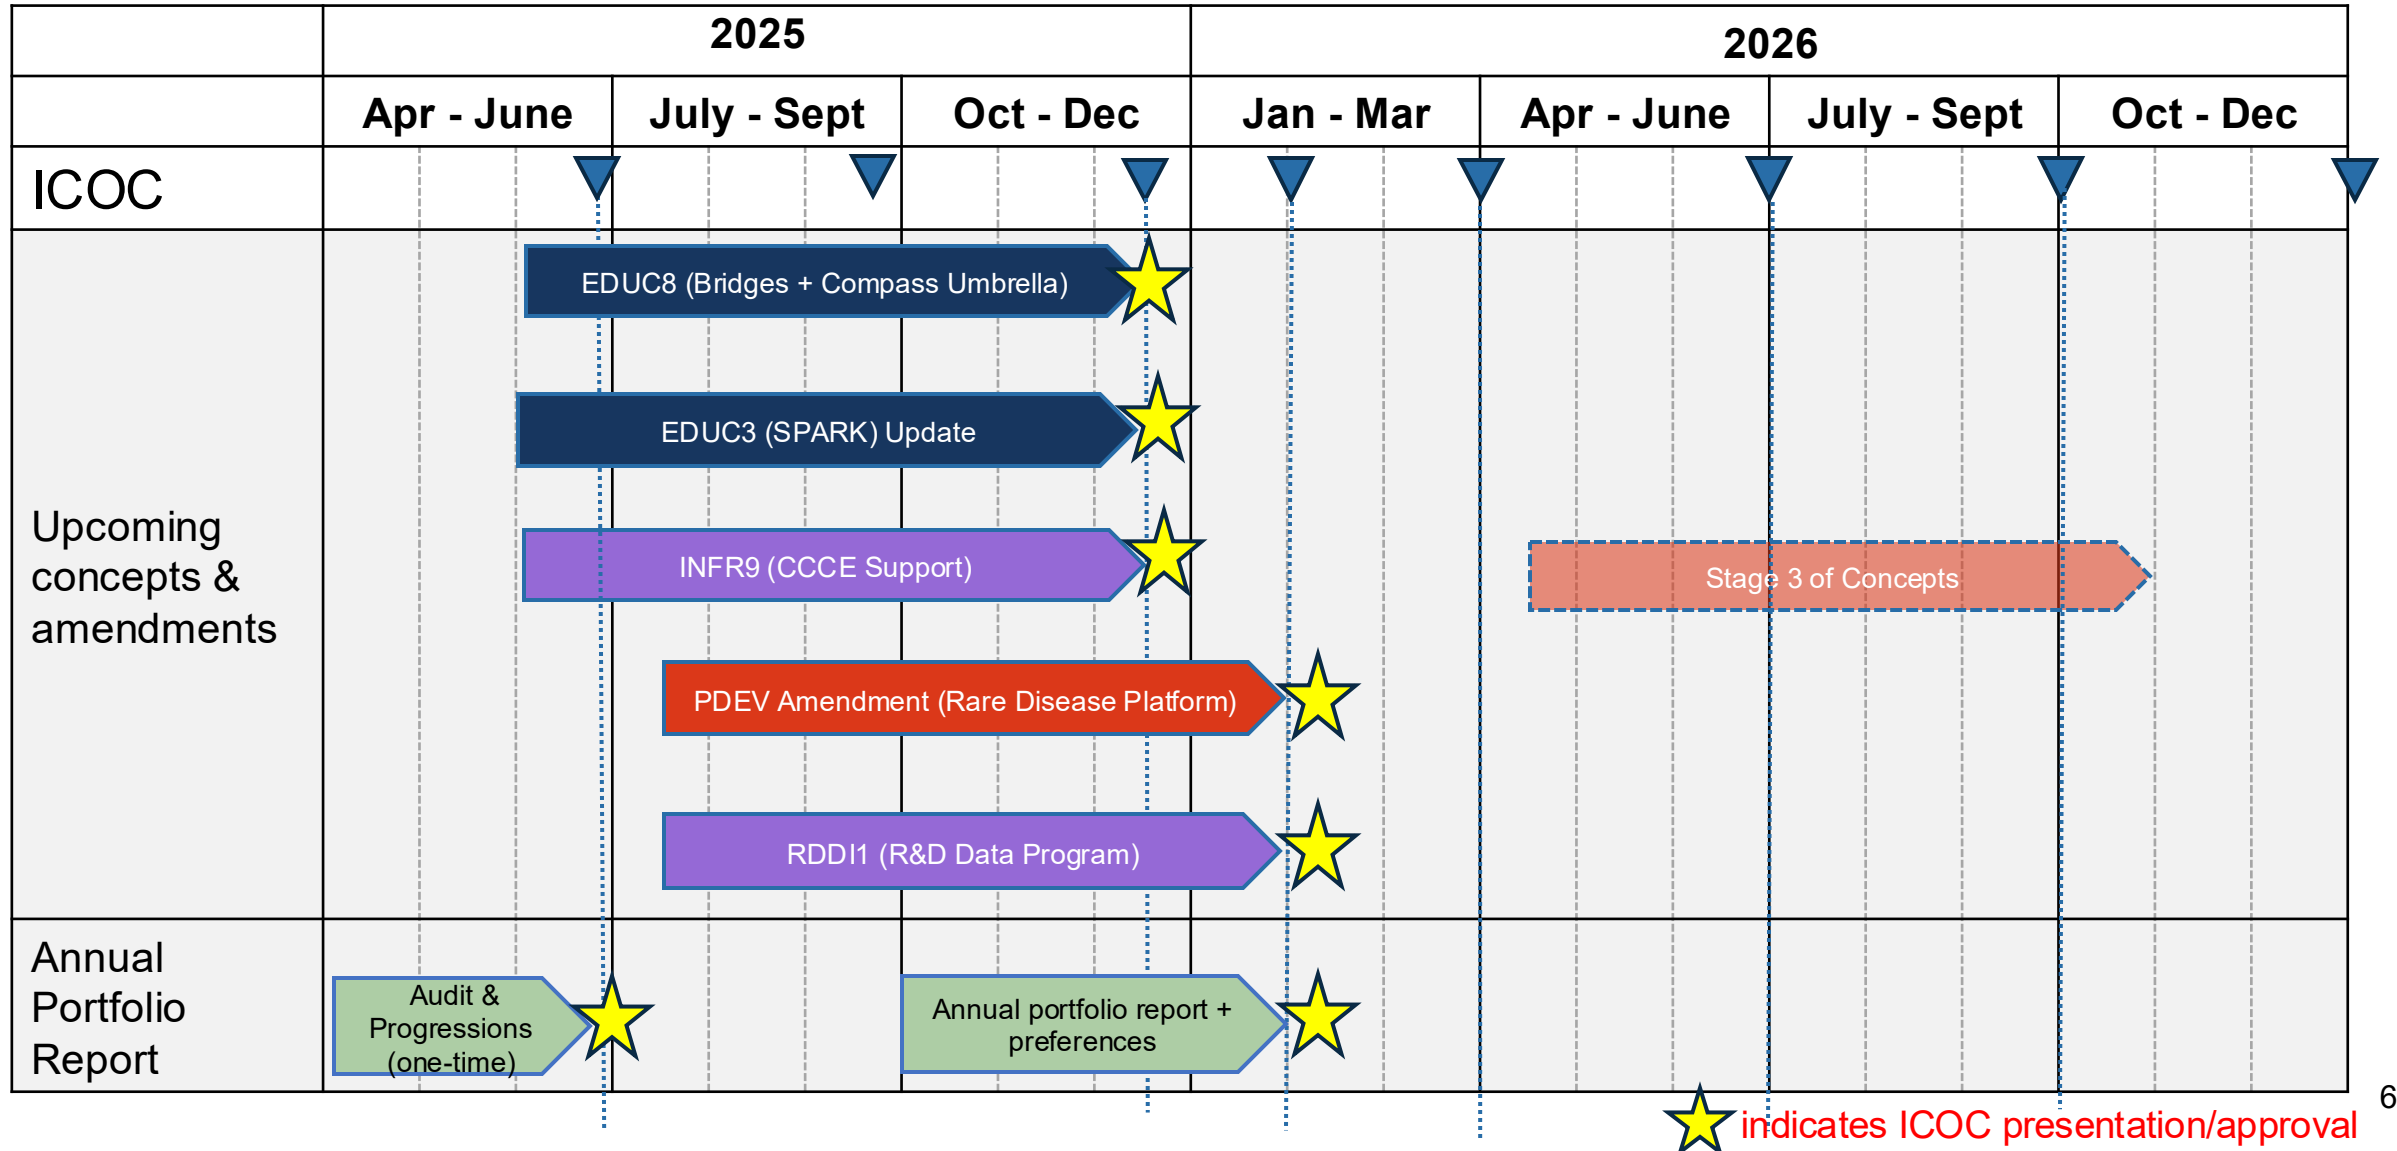

Pillar	2025/26	2026/27	2027/28	2028/29	2029/30	2030/31	Total
CLIN	\$135	\$135	\$235	\$135	\$135	\$235	\$1,010
PDEV	\$160	\$230	\$230	\$170	\$120	\$90	\$1,000
DISC	\$158.2	\$162	\$162	\$162	\$162	\$162	\$968.2
EDUC	\$1.5	\$119.5	\$182.5	\$2.5	\$2.5	\$2.5	\$311
INFR*	\$36	\$10	\$40	\$87	\$10	\$10	\$193*
TOTAL	\$490.7	\$656.5	\$849.5	\$556.5	\$429.5	\$499.5	\$3,482.2

Numbers in the table are in millions of dollars (\$000,000). Minor variances due to rounding

Qualification Process for CLIN2

Qualification Process for CLIN2

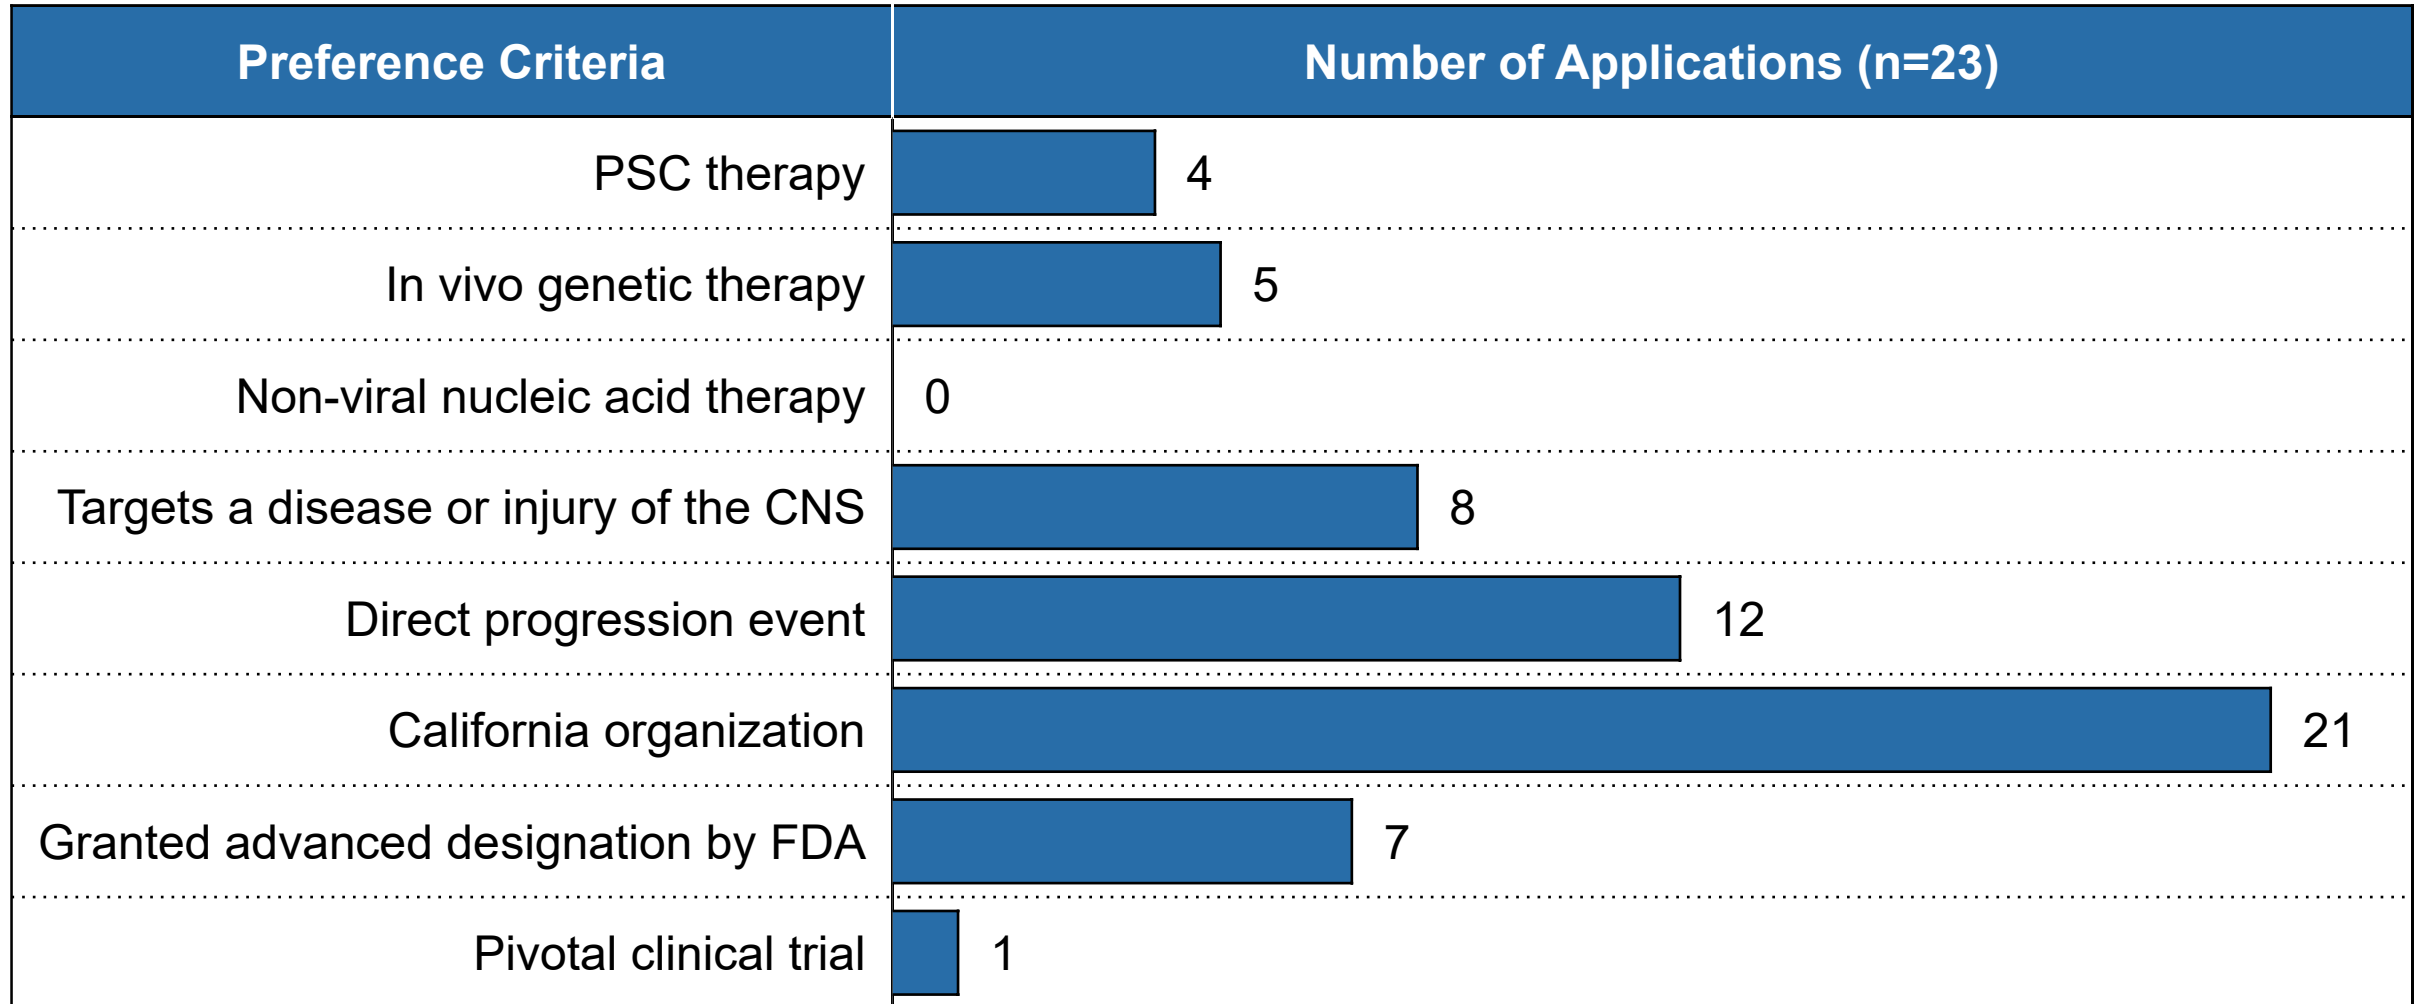

The CIRM Review Team examines key information in the applications to score them against objective criteria defined in the PA. Goal is to advance up to 7 applications per cycle.

CLIN2 | Preferences for FY25/26

Preferences are factored in during Qualification and ARS review

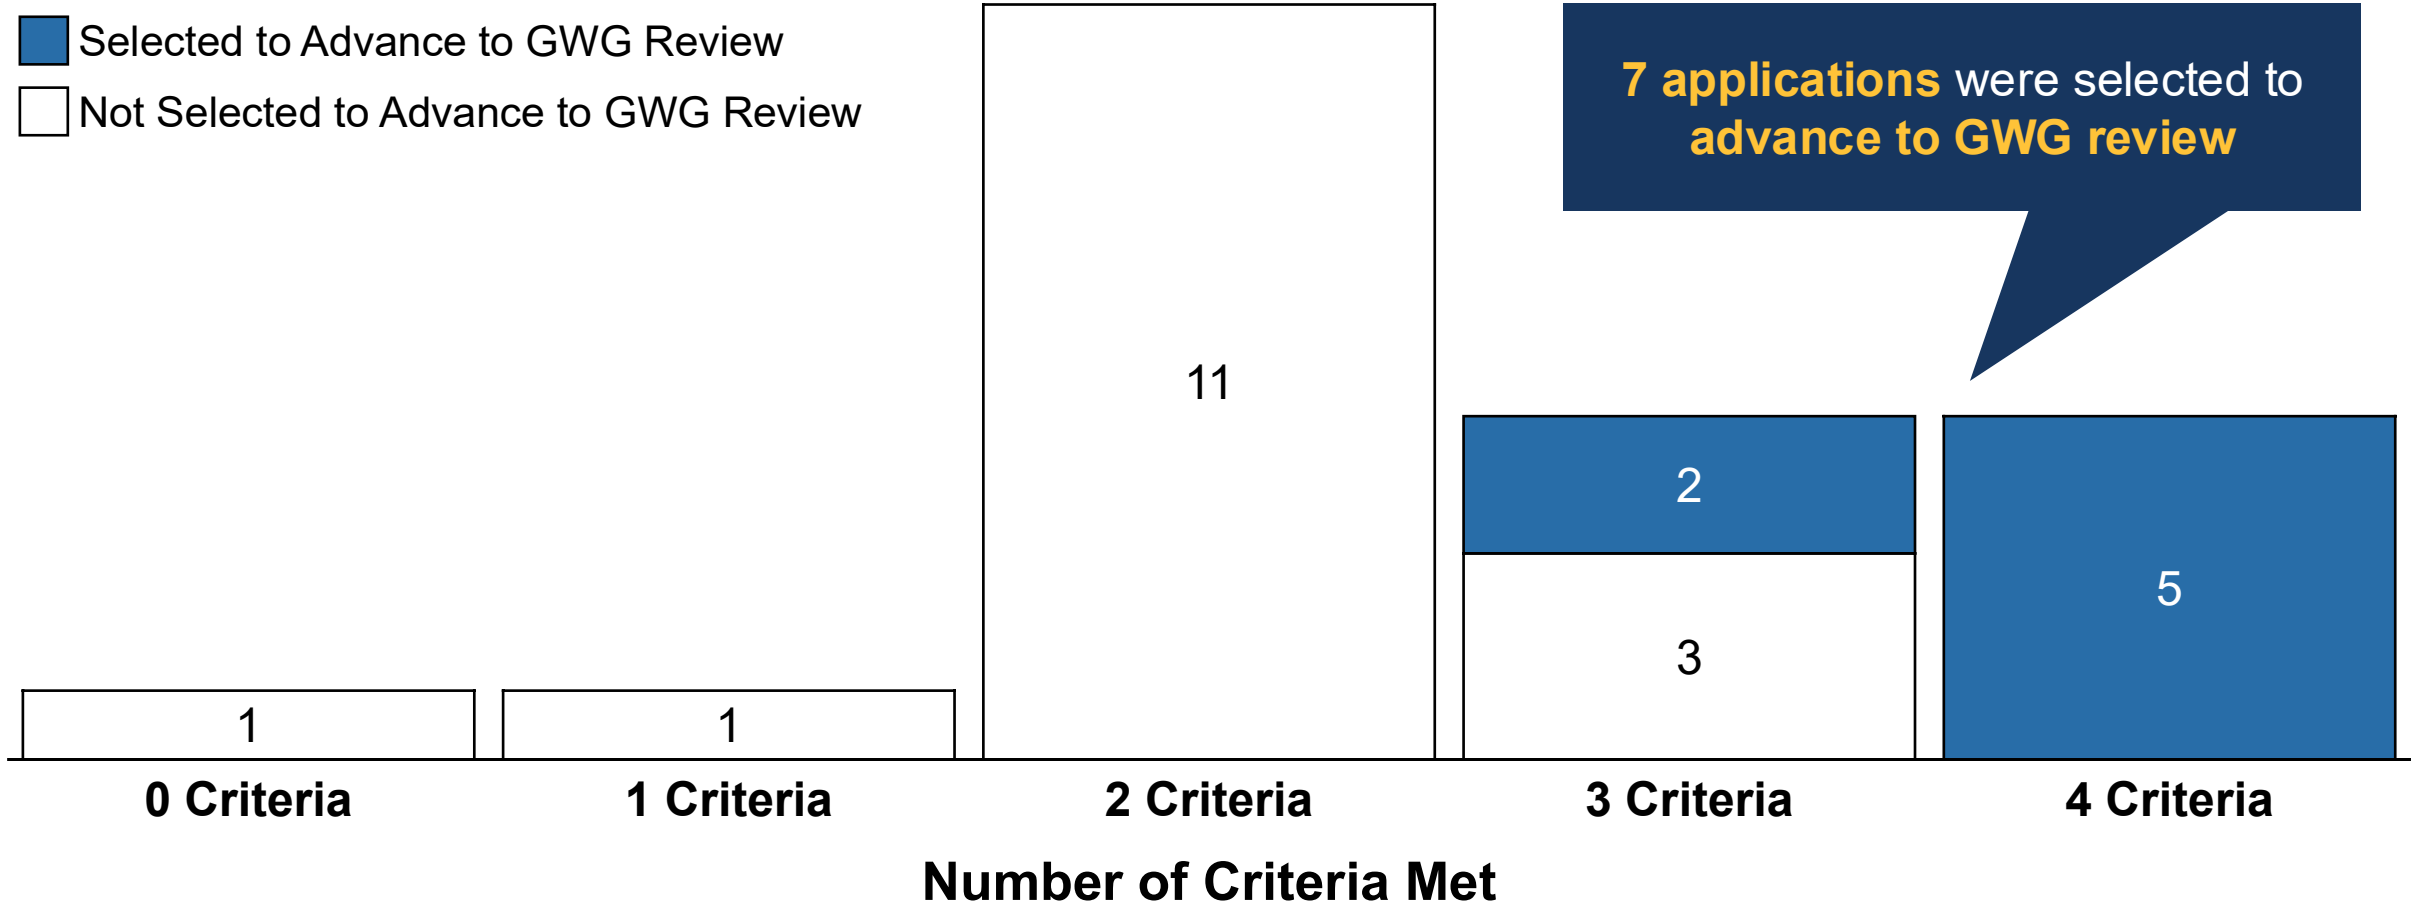

Concept Preferences	Rationale
Pluripotent stem cell-derived therapies	<ul style="list-style-type: none">• Propositions 71 and 14• Potential to address patient access & affordability barriers
<i>In vivo</i> genetic therapies	<ul style="list-style-type: none">• Potential to address patient access & affordability barriers
Non-viral nucleic acid delivery	<ul style="list-style-type: none">• Potential to address patient access & affordability barriers
Diseases of the brain and CNS (Prop 14)	<ul style="list-style-type: none">• Proposition 14 priority
CA organizations	<ul style="list-style-type: none">• CA taxpayer-funded initiative
Progressions from IND-enabling or pipeline trial awards	<ul style="list-style-type: none">• Advance CIRM-funded therapies
Fast Track, RMAT, or Breakthrough designations	<ul style="list-style-type: none">• Leverage greater FDA access
Pivotal trials	<ul style="list-style-type: none">• Fastest route to BLA

Qualification Criteria for First Round of CLIN2

PSC: Pluripotent Stem Cell; CNS: Central Nervous System

Qualification Outcomes for First Round of CLIN2

Qualification Outcomes for First Round of CLIN2

- Selected to Advance to GWG Review
- Not Selected to Advance to GWG Review

CNS

non-CNS

Number of Criteria Met

Qualification Process for CLIN2

All top 7 applications are from California organizations and therapies target CNS

- CNS Applications (8)
 - 6 are also pluripotent stem cell or in vivo gene therapies
 - 4 have an advanced designation
- Non-CNS Applications (15)
 - 3 are also pluripotent stem cell or in vivo gene therapies
 - 3 have an advanced designation

Although the top 7 applications are all targeting CNS, the fact that these applications also met additional concomitant preferences contributed to their selection

Summary

- CIRM is applying preferences in the selection of projects to ensure alignment with the SAF.
- Generally, projects require possessing multiple preferences to be selected.
- Although a preference for projects targeting diseases of the CNS is applied, projects addressing any disease area can be selected.
- As we have only completed one round, additional data on the use of preferences will continue to be collected and shared with the Board.
- Preferences are not static. CIRM will present an overview on the portfolio of funded projects each year to inform any changes to preferences that the Board may adopt.
