

# Real Life™

CIRM Access and Affordability Working Group  
Sean Turbeville, PhD  
Dec 1<sup>st</sup> 2022

**CIRM**  
CALIFORNIA'S STEM CELL AGENCY

- Provide a verbal update on the Patient Support Program and RFP
- An update on COI
- Update the AAWG on our first CCCE “Listening Session” at UCSF/Fresno
- Introduction and Kick-off of Roadmap for Access and Affordability

A series of regional meetings to inform the CCCE concept plan

- Understand the capacities of regional providers to support clinical research
- Identify workforce training needs to support patients in regenerative medicine
- Identify opportunities to partner with community-based organization

## Clinical Readiness

### Prep and Follow Patients Locally

Transplant model prep locally with local follow up.

### Proximity, Proximity, Proximity

Support networks are local so keeping services as local as possible is advantageous.

### Infrastructure is Comprehensive in Fresno Clovis

High capacity center for oncology, SCD and other conditions. Technical assistance and training is the major need.

### Eager for Alpha Clinic Collaboration

Many potential collaborative opportunities with Alpha Clinics. UC Davis in particular identified collaborative opportunities.

## Training

### Remote Grand Rounds

Training is needed and remote / virtual option is most practical.

### Time Constrains

Doctors are busy and often don't have time so online alleviates constraints.

A pier-to-pier network providing technical assistance is desirable (as opposed to cross training or residency programs)

### CMA & Primary Care Association Engagement

Connect up with established training and education programs and develop continuing education regenerative medicine modules to build great awareness among membership.

### Train the Trainer Opportunities

Alpha Clinics can facilitate knowledge transfer to CCCE sites so they can then develop local training programs. Resources exist in Fresno connectivity with experienced sites can help develop local programs.

## Increase Patient Access

### Trusted Intermediaries

Engage trusted community leaders irrespective of health background

### Young Professionals

Young professional can explain issues and they bridge generations. Find opportunities to engage.

### COVID Trauma

Patients went to hospitals and could not be seen by family and died. Rebuild trust; what is different now?

### Local Doctors

Local doctors have trust, engage them as this may be one way to get past "tribal" relations.

### Local Community Center / Gathering Places

Existing community centers that bring together groups are a great "entry point".

### Local Elected Officials

Many elected officials have an interest in health-related issues. They have established engagement networks and they may be leveraged for specific campaigns.

**Needs Assessment**

**Workshop**

**Draft Concept Plan**

**Application Phase**

**Regional Listening Sessions**

**Convene Stakeholders**

**Draft Proposal for AAWG Input**

**Final Approval: ICOC**

**What are provider, workforce and community needs**

**How can the CCCE program support broad access**

**Preliminary program concept and budget**

**ICOC consider program concept and budget**

ICOC PA Participation

ICOC Participation

Science Subcommittee Consultation

ICOC Review

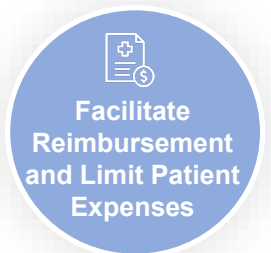

October – January 2023

March – April 2023

May 2023

June 2023

# Roadmap to Access & Affordability Strategies - Examples

<b>Patient Support Services</b>	<b>Engagement with Payers</b>	<b>Creation and/or endorsement of new State policy for C&amp;GT</b>	<b>Alpha Clinics and CCCE</b>
<b>Alpha Site Coordination and Alignment</b>	<b>Performance Based Models</b>	<b>Treatment across state lines</b>	<b>Patient and post-marketing Registries, RWE, HEOR</b>
<b>Patient Navigator at CCCEs</b>	<b>Introduce New Payer Mechanisms for Orphan Products</b>	<b>Inpatient vs. Outpatient reimbursement</b>	<b>Accelerate Advocacy at community level; Medical Education</b>
<b>Coverage Analysis, Insurance Support, Co-Pay Assistance, Access and Appeals</b>	<b>Risk Pools/Coalition Partners</b>	<b>Align to Gov Plan on Office of Health and Affordability</b>	<b>State and Federal authorized treatment centers</b>
