Agenda Item #6: President's Report

He also announced that Chief Administrative Officer Walter Barnes would be retiring in September 2006, and that Senior Communications Specialist Nicole Pagano would be leaving the CIRM at the end of July to attend graduate school. The CIRM is now seeking a Chief Communications Officer and a Chief Financial and Administrative Officer.

The scientific strategic planning process is now well under way, with the PWC consultant team in place, a dedicated page on the CIRM web site for strategic planning and the Strategic Plan Advisory Council having met twice in the past two months. The strategic planning team has also

held one Scientific Meeting for ICOC Members and the public, on May 25th in Los Angeles, and has another planned for July 13th in San Francisco. These are meetings to which the ICOC is welcome and encouraged to come, and include presentations by experts on the meeting topic. The topic for July 13th is "Scientific Strategy" and will include presentations by Dr. Stuart Orkin of Harvard and ICOC member Joan Samuelson, as well as Dr. Allen Spiegel, Dean of the Albert Einstein School of Medicine and Dr. Jill Heemskirk from NINDS.

The CIRM scientific team is also working on continued planning for the California/UK meeting on Stem Cell Self-Renewal and Differentiation, and the meeting on Assessment of Medical Risk for Egg Donors, both planned for the fall of 2006.

Dr. Hall also reported on the success of the May 22 Gala in San Francisco and thanked Deborah Strobin and the volunteer Gala Committee for their work on the event.

Agenda Item # 8: Consideration of Standards Working Group report, including but not limited to:

- a. **Update on APA process and timeline with respect to the CIRM Medical and Ethical Standards Regulations for Human Stem Cell Research.**
- b. **Overview of public comments on and recommended changes to the CIRM Medical and Ethical Standards Regulations for Human Stem Cell Research.**

Dr. Bernard Lo, Co-Chair of the Standards Working Group, walked the board through the changes made to the CIRM Medical and Ethical Standards Regulations for Human Stem Cell Research in response to public comments made during the public comment period that ended May 24, 2006. He also informed the board of the still unresolved issues, and of the revised timetable given the need to further address public comments before finalizing the regulations, and the need for an additional 15-day public comment period.

Due to the need for more time in finalizing the regulations now in the APA process, the Interim Regulations put in place by the ICOC on November 2, 2005 will now expire before the APA process is complete. The 270-day Interim Regulations are set to expire on July 30, 2006. Given that the CIRM must have regulations in place, especially having funded the first year of the Training Grant Program, the ICOC considered the adoption of the Interim Regulations as Emergency Regulations to ensure the CIRM continues to have regulations in place until the regulations in the APA process are finalized.

Motion:

- Dr. Baltimore moved approval of the Interim Regulations already in place, extending their life so the CIRM has regulations in place until the permanent regulations take effect.
- Dr. Penhoet seconded.

Vote:
